1800	21 May 2000	SELL	Hello, in first, excuse me for my poor level in english ! I have one leica M1 near to mint (really) without box and the only one problem is about the slow speed under 1/15s (don't start,need lube). rest of the camera is absolutly perfect except: trace of normal use on bayonet chrome is little more shining around the rewind knob (only visible on some reflect with lateral light) there is a very little trace sizing like an tiny hair of 1cm long on the top of the black opening back. these defaults are too little to be view on a jpeg chrome are absolutly perfect, there is absolutly no trace of metal under even on attachment, shoe, butons, edge, etc it's a level rewind not buton serial number 1085 444 thanks for your attention best regards bruno - <a href="#">bruno</a> <bruno_v@club-internet.fr>
